

DEADLINE APPROACHING:

Eligibility Requirements for CoC programs are due on September 30th. Program activity needs to be recorded and documents uploaded. Failure to complete by deadline can result in suspension of your CoC Accreditation and delay scheduling of upcoming survey. Completion of Eligibility Requirements will require a significant amount of time to collect all the documentation required for upload. Documents to be included are Hospital Accreditation certificate and/or letter, Bylaws defining Cancer Committee responsibilities along with policies that support many of the other activities within your program and the dates that your committee reviewed that activity. Be sure to start collection of these documents now to ensure that you complete all 12 Eligibility Requirements plus the Surgical Procedures and Prevention Programs currently offered at your facility. You may need to work with other departments within your facility to collect all the documentation that is required so don't wait any longer to get started.
